

Greenhouse Gas (GHG) Accounting & Resource Assistance

Why Account for GHG Emissions?

1. Provides an overall measure of your business activities climate change impact
2. Helps recognize your cost savings
3. Resonates with employees, customers and public
4. Sets a baseline, allowing you to measure progress and set goals

How Can ECOSS Help?

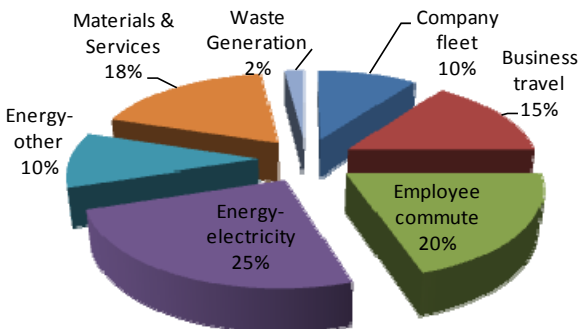

ECOSS can schedule a site visit to walk you through the Seattle Climate Partnership Carbon Footprint Calculator. We'll help you develop goals and build strategies to achieve them.

ECOSS can assist your business to **leverage resources, provide support** and **facilitate savings** from:

- Energy conservation
- Water conservation
- Waste reduction
- Transportation options

The CO₂ tool allows you to view your return of investment options, input your data from EPA's Portfolio Manager and prioritize actions by the most cost effective strategy.

REDUCTION POTENTIAL EXAMPLE

Always Confidential, Always Free.

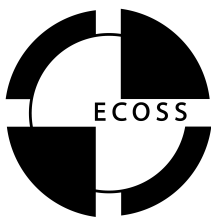

We do not Charge for Services!

Our goal is to help your company realize financial savings through resource conservation. We can offer assistance and training in multiple languages. ECOSS has helped thousands of businesses to improve their environmental performance since 1994.

Our Mission is to Assist You!

ECOSS is a non-profit organization working with Puget Sound businesses and neighborhoods for an environmentally responsible community.

ECOSS provides environmental education, technical resources and other services. We act as a voice for the community on issues that encourage a clean environment and urban redevelopment.
